DETAILED ACTION

1. Claims 1- 4 are presented for examination.

Claim Objections

2. Claim 1-2, and 4 are objected to because of the following informalities:

3. There are some minor errors (i.e., typographical error) in the claims, such as in claim 1 recited "...trough their browsers..." or "...trough his or her browser...".

Applicant is required to correct these typo errors.

4. Also, the numerical indication in the parentheses (i.e., www-browser (102), the page (104)) as recited in the claim language (claims 1-4) is not appropriate.

Applicant is requested to remove/delete these parenthesis.

5. Claim 1 recited the limitations "the controller", "said program controlling code", "the page (104)", the address of the www-page (110)", "the window (107)", "the page (110)", "the listeners' page (104)", "said browsers", "said documents", "the controller's server (100)", "the changes", "the copy of the page (104)", "said listeners' browsers", "said files", "the copy of the page", "the listeners' www-browsers (108)".

There is lack of antecedent basis for these limitations in this claim. Appropriate correction is required.

6. Claim 2 recited the limitation "the address of the www-document". There is insufficient of antecedent basis.

7. Claim 4 recited the limitations "the actions", "the session". There is lack of antecedent basis for these limitations in the claim.

Appropriate correction is required.

Specification

8. The abstract of the disclosure does not commence on a separate sheet in accordance with 37 CFR 1.52(b)(4). A new abstract of the disclosure is required and must be presented on a separate sheet, apart from any other text.

The following guidelines illustrate the preferred layout for the specification of a utility application. These guidelines are suggested for the applicant's use.

Arrangement of the Specification

9. As provided in 37 CFR 1.77(b), the specification of a utility application should include the following sections in order. Each of the lettered items should appear in upper case, without underlining or bold type, as a section heading. If no text follows the section heading, the phrase "Not Applicable" should follow the section heading:

- (a) TITLE OF THE INVENTION.
- (b) CROSS-REFERENCE TO RELATED APPLICATIONS.
- (c) STATEMENT REGARDING FEDERALLY SPONSORED RESEARCH OR DEVELOPMENT.
- (d) INCORPORATION-BY-REFERENCE OF MATERIAL SUBMITTED ON A COMPACT DISC (See 37 CFR 1.52(e)(5) and MPEP 608.05. Computer program listings (37 CFR 1.96(c)), "Sequence Listings" (37 CFR 1.821(c)), and tables having more than 50 pages of text are permitted to be submitted on compact discs.) or
REFERENCE TO A "MICROFICHE APPENDIX" (See MPEP § 608.05(a). "Microfiche Appendices" were accepted by the Office until March 1, 2001.)
- (e) BACKGROUND OF THE INVENTION.
 - (1) Field of the Invention.
 - (2) Description of Related Art including information disclosed under 37 CFR 1.97 and 1.98.
- (f) BRIEF SUMMARY OF THE INVENTION.
- (g) BRIEF DESCRIPTION OF THE SEVERAL VIEWS OF THE DRAWING(S).
- (h) DETAILED DESCRIPTION OF THE INVENTION.
- (i) CLAIM OR CLAIMS (commencing on a separate sheet).
- (j) ABSTRACT OF THE DISCLOSURE (commencing on a separate sheet).
- (k) SEQUENCE LISTING (See MPEP § 2424 and 37 CFR 1.821-1.825. A "Sequence Listing" is required on paper if the application discloses a

nucleotide or amino acid sequence as defined in 37 CFR 1.821(a) and if the required "Sequence Listing" is not submitted as an electronic document on compact disc).

Content of Specification

- (a) Title of the Invention: See 37 CFR 1.72(a) and MPEP § 606. The title of the invention should be placed at the top of the first page of the specification unless the title is provided in an application data sheet. The title of the invention should be brief but technically accurate and descriptive, preferably from two to seven words may not contain more than 500 characters.
- (b) Cross-References to Related Applications: See 37 CFR 1.78 and MPEP § 201.11.
- (c) Statement Regarding Federally Sponsored Research and Development: See MPEP § 310.
- (d) Incorporation-By-Reference Of Material Submitted On a Compact Disc: The specification is required to include an incorporation-by-reference of electronic documents that are to become part of the permanent United States Patent and Trademark Office records in the file of a patent application. See 37 CFR 1.52(e) and MPEP § 608.05. Computer program listings (37 CFR 1.96(c)), "Sequence Listings" (37 CFR 1.821(c)), and tables having more than 50 pages of text were permitted as electronic documents on compact discs beginning on September 8, 2000.

Or alternatively, Reference to a "Microfiche Appendix": See MPEP § 608.05(a). "Microfiche Appendices" were accepted by the Office until March 1, 2001.
- (e) Background of the Invention: See MPEP § 608.01(c). The specification should set forth the Background of the Invention in two parts:
 - (1) Field of the Invention: A statement of the field of art to which the invention pertains. This statement may include a paraphrasing of the applicable U.S. patent classification definitions of the subject matter of the claimed invention. This item may also be titled "Technical Field."
 - (2) Description of the Related Art including information disclosed under 37 CFR 1.97 and 37 CFR 1.98: A description of the related art

known to the applicant and including, if applicable, references to specific related art and problems involved in the prior art which are solved by the applicant's invention. This item may also be titled "Background Art."

- (f) Brief Summary of the Invention: See MPEP § 608.01(d). A brief summary or general statement of the invention as set forth in 37 CFR 1.73. The summary is separate and distinct from the abstract and is directed toward the invention rather than the disclosure as a whole. The summary may point out the advantages of the invention or how it solves problems previously existent in the prior art (and preferably indicated in the Background of the Invention). In chemical cases it should point out in general terms the utility of the invention. If possible, the nature and gist of the invention or the inventive concept should be set forth. Objects of the invention should be treated briefly and only to the extent that they contribute to an understanding of the invention.
- (g) Brief Description of the Several Views of the Drawing(s): See MPEP § 608.01(f). A reference to and brief description of the drawing(s) as set forth in 37 CFR 1.74.
- (h) Detailed Description of the Invention: See MPEP § 608.01(g). A description of the preferred embodiment(s) of the invention as required in 37 CFR 1.71. The description should be as short and specific as is necessary to describe the invention adequately and accurately. Where elements or groups of elements, compounds, and processes, which are conventional and generally widely known in the field of the invention described and their exact nature or type is not necessary for an understanding and use of the invention by a person skilled in the art, they should not be described in detail. However, where particularly complicated subject matter is involved or where the elements, compounds, or processes may not be commonly or widely known in the field, the specification should refer to another patent or readily available publication which adequately describes the subject matter.
- (i) Claim or Claims: See 37 CFR 1.75 and MPEP § 608.01(m). The claim or claims must commence on separate sheet or electronic page (37 CFR 1.52(b)(3)). Where a claim sets forth a plurality of elements or steps, each element or step of the claim should be separated by a line indentation. There may be plural indentations to further segregate subcombinations or related steps. See 37 CFR 1.75 and MPEP § 608.01(i)-(p).
- (j) Abstract of the Disclosure: See MPEP § 608.01(f). A brief narrative of the disclosure as a whole in a single paragraph of 150 words or less commencing on a separate sheet following the claims. In an international

Art Unit: 2155

application which has entered the national stage (37 CFR 1.491(b)), the applicant need not submit an abstract commencing on a separate sheet if an abstract was published with the international application under PCT Article 21. The abstract that appears on the cover page of the pamphlet published by the International Bureau (IB) of the World Intellectual Property Organization (WIPO) is the abstract that will be used by the USPTO. See MPEP § 1893.03(e).

- (k) Sequence Listing, See 37 CFR 1.821-1.825 and MPEP §§ 2421-2431. The requirement for a sequence listing applies to all sequences disclosed in a given application, whether the sequences are claimed or not. See MPEP § 2421.02.

10. Applicant is required to provide the abstract, specification and claims in separate sheets.

Claim Rejections - 35 USC § 102

11. The following is a quotation of the appropriate paragraphs of 35 U.S.C. § 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

12. Claims 1-4 are rejected under 35 U.S.C. § 102(b) as being anticipated by **Smythe et al. WO No. 98/13995**.

13. As to claim 1, **Smythe** teaches the invention as claimed, including a method for directing a www-browser, in which the controller starting a session, using his/her own www-browser (102), specifies via Internet an HTML-document for the

Art Unit: 2155

browser of one or more listeners, being accessible to them through their browsers (108), and to said controller through his or her browser (101), to a program, which is a part of the method and is located in a server (100) accessible to said controller, said program controlling code containing file embedded onto the page (104) (figure 1, pages 18-19); said controller instructing the listeners via any simultaneously used media to choose said HTML-document, further specifying by means of his browser the address of the www-page (110) intended to be displayed in the window (107) of the page (104); and said address being further delivered to the server and to said program, which embeds said address of the page (110) onto the listeners' page (104) characterized in that the listeners' page (104), upon being displayed by listeners' browser (108) and controller's browser (101), make said browsers continuously check for possible change in said documents in the controller's server (100), and finding the changes, refreshes the copy of the page (104) of said listeners' browsers to match said files at the server, the refreshing of the listeners' page (104) being conditioned by monitoring change in a parameter residing in the said server, changed by the program (103) upon a different www-address having been chosen, after which the copy of the page (104) in the listeners' www-browsers (108) and controller's www-browser (101) is refreshed (abstract, pages 18-21).

14. As to claim 2, **Smythe** teaches the invention as claimed, characterized in that the controller picks the address of the www-document displayed on the listeners'

Art Unit: 2155

browsers (108) from a previously created list of www-addresses (page 19, line 25-page 20, line 11).

15. As to claim 3, **Smythe** teaches the invention as claimed, characterized in that the controller chooses the listeners allowed to access to the page (104) from a previously created list displayed on his/her www-browser (pages 19-20).

16. As to claim 4, **Smythe** teaches the invention as claimed, characterized in that by browsers (101) and (108), several listeners and at least one controller by his/her browser (102) are sharing the action of said server (100) and said program (103) during the session (abstract, pages 18-19).
